Name of the Student _____ Class & Section: _____

First Preference	Second Preference	Third Preference

Name of the Parent	Signature of the Parent	Mobile No.

An Overview of the Paid Activity Club's

MUN Club (Model United Nations Conference)

A Model United Nations Conference, is a simulation of the United Nations. It's not just a platform to showcase debating skills, it also serves the purpose of personality development and global outlook.

It helps the students to improve their social, communication and inter-personal skills. Their logical and analytical skills refine to a greater extent. They have a greater knowledge of technical aspects and adopt a rational approach in their lives. They learn how to assimilate information, make a point and arrive at a solution, how to cooperate and exchange ideas, and how to think creatively.

It provides them with a global outlook as their knowledge about the working of bigger institutions like United Nations and its organs increases. It gives them an overview of the Code of Conduct and the policies followed during such intense deliberations.

MUN motivates the students to strive forward and make a difference in the world, not just as citizens of a country, but as global citizens.

EdgeMakers Club

The EdgeMakers Program is designed by John Kao, who over the last three decades has been a Professor at Harvard University, Advisor to Governments and Multi-National Corporations. EdgeMakers work with students across the United States of America, Brazil, Colombia and India.

The program empowers young students to become **Leaders, Entrepreneurs and Innovators**.

The following Clubs are being offered at the school:

1. Creativity & Innovation Club for students in **Grades 4 & 5**

Through scientifically designed activities, games & projects, the Creativity & Innovation module will unlock the creative potential of students and help them become critical thinkers & problem solvers.

2. Storytelling & ChangeMaking Club for students in **Grades 6 to 8**

Through scientifically designed activities, games & projects, the Storytelling & ChangeMaking module will enhance communication skills and overall personality of students. Strong communication skills are critical to succeed in today's world.

3. Design Edge Club for students in **Grades 9 to 11**

Students will learn techniques such as Ideation and Prototyping that are critical to build world-class products and solutions.

Classes would be conducted by EdgeMakers Experts.

Students will receive a certification from EdgeMakers (signed by John Kao) and endorsed by the Institute for Large Scale Innovation.

Robotics Club

To impart the latest IT education, we initiated the "Robotics Club" in the year 2012. The aim of this club is to train our students in assembling and programming of robots.

The entire programme is divided in 2 levels i.e Beginners and Advanced.

RoboGenius program participants are engaged in dynamic activities and by using the experience, they become the protagonists of their own learning. Students discover an exciting and important connection with real world applications, an experience that is vital for success in the 21st century.

The RoboGenius Academy will use LEGO Education products during the course and specific science and mathematics concepts will be identified, which will then be reinforced in a fun filled way and the students will experience these concepts through the models they create.

The students will be given the certification on successful completion of the course.

Space Club

Space Club offers certification courses on astronomy and space science education at two levels, Beginners and Intermediate. The course includes outdoor scientific camps, day and evening observations carried out within and outside the school campus. The students primarily learn science by observing and analyzing objects around them. The course teaches budding astronomers various skills including - Focusing a telescope on a celestial object, Identifying celestial objects, Identifying directions without aid, Finding local time and much more.

The Club brings the student closer to the environment through its astronomy based outdoor activities. Space Club's out of the box activities inculcates scientific temper & the love for science and environment amongst the students. The modules, which are best implemented modules in the world, have been developed in-house by our research team.

STEAM CLUB (Science Technology Engineering Arts Mathematics): *Sharpening Creative Minds*

Creative Thinkers™, in line with its overarching mission to promote creative and innovative thinking, introduces (STEAM CLUBS), that pushes the limits of expression of creativity in students. We all know that Creativity and Innovation skills increasingly are being recognized as the skills that separate students who are prepared for increasingly complex life and work environments in the 21st century, and those who are not. So a keen focus on creativity, critical thinking, communication and collaboration is essential to prepare students for the future.

To prepare students for careers in STEAM (Science Technology Engineering Arts Mathematics) and become creative problem solvers, this is going to be the first and a very important step in their academic journey and life. As they are going to be the future of our nation, not only this program is going to be beneficial for them, but also for our entire nation. So to start this Creative revolution, Creative Thinkers have developed and designed an innovative, engaging yet highly informative program.
