***For Class VII***

## Dear Parents

Greetings!

We are pleased to inform you that our students have been successful in completing their first Integrated Project Based Learning on theme '**Mask Making**'. It has been very encouraging to note the enthusiastic participation by the students in adopting new methodology of teaching-learning. The students gained real time experience of making masks, researched on various concepts that were related to the topic. They were able to come up with innovative methods of presentations that gave them self-confidence and made them keen observers.

We now endeavor to continue with this from July. To implement this, emphasis will be laid to make the students learn their concepts through the theme-based study by integrating scholastic as well as co-scholastic disciplines.

The theme selected for the same is '**Tie and Dye with Organic Colors**'. In Project Based Learning (PBL), at each step the students will be given a task that upon completion will be followed by the feedback and reflections. The methodology adopted shall be aimed at research, innovation, teamwork and practical application of the concepts.

The PBL aims at following learning objectives:

- To develop academic content knowledge along with skills.
- To build critical thinking, problem solving, communication, collaboration and creative skills.

This will help the students to gain confidence for meeting new challenges in school and in their daily lives.

The assessment of students will be conducted in a non-threatening way by using formative and summative assessment tools to test the concepts regularly.

In lieu of the above, please find the attached following documents:

**Appendix 1:** Academic Planner (monthly)
